

Joint Press Release  
11/05/2021

## Alternoil customers now able to make cashless payments at LIQVIS LNG filling stations

LNG truck drivers can now fill up their vehicles at LNG filling stations operated by LIQVIS and make cashless payments with the Alternoil fuel card. Alternoil is an active participant in the expansion of a comprehensive network of LNG and bio-LNG filling stations in Europe. As a part of this process the medium-sized company is capitalising on the existing partner network by accepting a wide range of filling cards, as well as on the company's existing filling station infrastructure. Alternoil is pursuing a holistic concept, which includes the planning, construction, smooth operation and supply of filling stations for advanced fuels.

**Sebastian Gröbblinghoff, Managing Director of LIQVIS GmbH:** "We are delighted to be extending the use of our LNG filling stations to Alternoil fuel card holders in the future. We will be systematically expanding our presence in Germany throughout 2021 and enabling our customers to fill up their vehicles with LNG at other convenient and accessible locations. We and Alternoil—our new and highly capable fuel card partner—are united by the common goal of providing our customers with an extensive and reliable network of LNG filling stations."

**Alexander Renz, Managing Director of Alternoil GmbH:** "We want to provide our customers with the most comprehensive network of LNG filling stations possible. We are therefore looking forward to fruitful collaboration with our new partner, LIQVIS GmbH. In future, LIQVIS GmbH filling locations will be accessible using the Alternoil fuel card. This year, we are expanding our network to include approximately 30 sites. The partnership with LIQVIS is another important step in expanding the LNG infrastructure and advancing the common goal of sustainable heavy-duty transportation."

LNG trucks release very little particulate matter and nitrogen oxide, which means they easily meet the high environmental requirements of the Euro VI emission standards. Moreover, heavy-duty trucks weighing over 18 tonnes with an annual mileage of at least 100,000 kilometres have significantly lower fuel costs than diesel vehicles. A further advantage of vehicles powered by LNG is that they are exempt from motorway tolls in Germany.

Uniper subsidiary LIQVIS has been operating LNG filling stations since 2017. These are located at strategic transport hubs that serve a particularly high volume of trucks, such as Berlin-Grünheide, Hannover-Langenhagen and Kassel-Lohfelden. To meet the increasing demand for this alternative fuel, systematic expansion of the German LNG filling station infrastructure is planned for the coming years. As such, this year LIQVIS stations will also be commissioned in the Bad Honnef, Bönen and Magdeburg regions, for example.

#### **About Liqvis**

Liqvis is a wholly owned subsidiary of Uniper SE that is building and operating a needs-based LNG infrastructure for heavy goods vehicles. Founded in 2015, Liqvis has been operating LNG filling stations in Germany since 2017. Steady expansion of this LNG filling station infrastructure is planned for the next few years.

#### **About Alternoil**

Based in Steinfeld, Lower Saxony, Alternoil GmbH is a service station operator and a pioneer in the transformation process for clean heavy-duty transportation. Founded in 2006, the company provides advanced, environmentally friendly and profitable fuel alternatives for heavy-duty transportation. Since the beginning of the year, Alternoil has been offering REEFUEL (bio-LNG) fuel alongside LNG at its filling stations.
