

Joint Press Release  
August 2022

## Vulcangas customers are now able to make cashless payments at LIQVIS LNG filling stations in Germany and France

Every owner of a VCard can now benefit from access to the growing LIQVIS infrastructure network and can fill up their trucks at the LNG filling stations in Germany and France. With the newly opened station in Leipzig, LIQVIS offers 10 LNG refuelling stations in Germany and 2 in France.

LIQVIS and Vulcangas are pleased to have gained each other as a strong business associate. This partnership is an example of our common commitment to provide more logistics companies access to an international LNG filling station network, especially on the frequented route from Italy via Germany to France.

For LIQVIS, Vulcangas is a valuable business partner because they open doors to strategically highly important customers: Italian freight forwarders and logistics companies. LIQVIS is looking forward to welcoming all Vulcangas customers at our stations in Germany and France and to supply them with LNG. Vulcangas is also pleased to start its partnership with LIQVIS by adding its infrastructure to the company's network of gas filling stations in Europe. The new agreement means that Vulcangas will increase its offer with a new strategically located network. It is a pleasure for the company to collaborate with an industry leading partner such as LIQVIS.

Uniper subsidiary LIQVIS has been operating LNG filling stations since 2017. These are located at strategic transport hubs that serve a particularly high volume of trucks, such as Bad Honnef, Berlin, Bönen, Gotha, Hamburg, Hannover, Kassel, Leipzig, Magdeburg and Ulm. This year LIQVIS stations will also be commissioned in Alsfeld and Salzbergen. By establishing strategic partnerships for purchasing BIO-LNG from sustainable sources, Liqvis is also setting the course for CO<sub>2</sub>-neutral heavy duty logistics. In 2023 Liqvis will offer first BIO-LNG quantities as an alternative fuel for heavy duty trucks at its LNG filling stations in Germany.

As of today, VCARD users will find an important tool: thanks to the LIQVIS network, they will also be able to refuel their vehicles in Germany and France. This partnership makes Vulcangas very proud and represents a clear snapshot of the good work done in recent years as industry players: thanks to our commitment, more and more logistics companies will have access to a Vulcangas network of LNG filling stations. We are therefore confident that the joint effort between Vulcangas and LIQVIS will result in a major impact for CO<sub>2</sub> emission reductions.

### About LIQVIS

LIQVIS builds and operates a demand-driven infrastructure for LNG in heavy-duty transport. Founded in 2015, Liqvis has been operating LNG refueling stations at strategic transport hubs with particularly high truck volumes since 2017. To meet the increasing demand for this alternative fuel, systematic expansion of the German LNG filling station infrastructure is planned for the coming years. ### **About Vulcangas**

For over 50 years, Società Italiana Gas Liquidi S.p.A. - Vulcangas has always supplied clean energy and the Vulcangas brand stands for efficiency, quality, environment consciousness, research, and development. We play a key role in the market field with a network of 7 LPG storages and 11 branches which cover all the Italian territory.

With more than 50 companies daily supplied, Vulcangas is the Italian market leader in the LNG trade for the civil, industrial, and automotive sectors.

Since 2020, Vulcangas has been releasing BioLNG (liquefied biomethane) for automotive use, produced in Italy from certified supply chain, which is already available at 11 service stations.

This is Vulcangas concrete contribution to significantly reduce CO2 emissions.

VCARD is Vulcangas fuel card which is increasingly in demand by fleets, logistics and transport companies. It works on more than 65% of the L-LCNG service stations throughout Italy AND 90% of Italian LNG Trucks. An extensive coverage along the major freight transport routes makes it easy to refuel any LNG-powered vehicle.
